PROFESSIONAL SUMMARY

Cloud and DevOps-focused Python developer with strong experience in Linux systems,infrastructure automation,and cloud platforms(AWS,GCP).Skilled in building production-ready tools,backend services,and automation pipelines using Python,FastAPI,and modern DevOps practices.Experienced in Linux system administration,CI/CD workflows,REST API development,and scalable cloud-based architectures,with a strong focus on reliability,automation,and developer productivity.

TECHNICAL SKILLS

Cloud & DevOps: AWS, Google Cloud Platform (GCP), Docker, Git, GitHub, GitHub Actions, CI/CD Pipelines, Cloud Infrastructure Automation

Linux & Systems: Arch Linux, Linux Administration, Shell Scripting, System Automation, i3wm, Linux Performance Monitoring

AI / NLP: LLaMA Models, DeepSeek, NLP Tokenization, Sentiment Analysis, Ollama, OpenRouter API

Databases: SQLite, Supabase, JSON Data Pipelines

Tools: Playwright, BeautifulSoup4, Telegram Bot API, React.js

Languages: Python, C, JavaScript, Bash, HTML5, CSS3

Backend: FastAPI, Node.js, REST APIs, Bun Runtime

PROJECTS

Senti-Vox — Multilingual Sentiment Analysis Platform *Link:* ***senti-vox.vercel.app***

Tech: Python, Next.js, TypeScript, Supabase, LLaMA, DeepSeek

Built a multilingual sentiment analysis platform for English, Hindi, Marathi, and Tamil using an AI voting pipeline that aggregates LLM sentiment scores and exposes results via REST APIs with word clouds and keyword extraction.

Arch Linux Desktop Automation Suite *Link:* ***github.com/W0nder0fy0u***

Tech: Python, Bash, pywal, i3wm, Arch Linux

Created a Linux desktop automation framework that auto-generates UI themes from wallpapers and provides CLI tools for theme management, brightness control, transparency, and system customization.

Linux Diagnostic Tool *Link:* ***github.com/W0nder0fy0u/linux-diagnostic-tool***

Tech: C, /proc filesystem, /sys filesystem

Developed a lightweight Linux CLI monitoring tool for CPU, memory, disk, and network usage with JSON/CSV export and hardware diagnostics using direct /proc and /sys filesystem access.

ClawBot — AI Job Automation Bot (In Development)

Tech: Python, Playwright, BeautifulSoup4, SQLite, Telegram Bot API

Building an AI-powered job automation assistant that scrapes job platforms, ranks listings using LLM scoring, generates tailored cover letters, and sends alerts through a Telegram bot.

EXPERIENCE

Independent Developer&Open Source Contributor

- Built and deployed automation tools,cloud-integrated applications,and Linux utilities focused on system automation and developer productivity.
- Developed solutions involving Python automation,Linux scripting,REST API development,CI/CD workflows,and cloud integrations.
- Actively contributing to open-source projects and personal engineering tools.

Education

Graphic Era Deemed to be University, Dehradun ***Master of Computer Applications(MCA) 2027***

2025-2027(Expected)

Graphic Era Hill University, Dehradun ***Bachelor of Computer Applications(BCA), CGPA: 7.4 2023***

Graduated

CORE STRENGTHS

- Python Development and Automation
- Linux System Administration and Shell Scripting
- DevOps Practices and CI/CD Pipelines
- Cloud Platforms(AWS,Google Cloud Platform)
- REST API Development and Integration
- Analytical Problem Solving and Critical Thinking
- Collaborative Development and Team Communication
